Availing Integrated Care To Children

Preventative, well-child, health care is essential to children's well-being. Black Family Development, Inc. is blessed each year to serve hundreds of children and youth. The majority have not benefitted from routine well-child screening.

BFDI's Integrated Care array is intended to help bridge that preventable gap.

Program Description:

Quality health care begins with dignity. The knowledgeable staff at BFDI, together with our stellar families, strives to make holistic health care an accessible and friendly aspect of caring for the whole child.

Scope:

To assess the age-appropriate development of our youngest clients, families will be provided with well-child screening, health education and counseling, vision and hearing screenings, sports physicals, and other pediatric services, including case management to link families to ongoing preventative health care through their primary care provider. This service will help bridge the gap between patients and their primary care providers.

Partners:

BFDI, in partnership with **Authority Health**, is pleased to extend health services to BFDI consumers.

"At Authority Health, our hope is to provide medical care in conjunction with the behavioral health and social services that Black Family Development, Inc. already offers their clients, to help bridge the relationship between clients and their primary care physician. Authority Health will seek to build up families in the form of performing school and sports physicals, health screens, vision/hearing screens, developmental surveillance, urine and anemia screens, health education/counseling including: nutrition, exercise, injury/disease prevention, development, and safety."
